CLOSURE PLAN APPROVAL FOR ECOLOGY CONTROL INDUSTRIES -
FONTANA, 13738 SLOVER AVENUE, FONTANA, CALIFORNIA, EPA ID. NO.
CAD982484933

Dear Mr. Flury:

The Department of Toxic Substances Control (DTSC) hereby approves the Hazardous Waste Facility Closure Plan dated November 30, 2006 for ECI Fontana with modifications.

A public notice advertising the public comment period for the Draft Closure Plan was published in the Sun English language, and the El Chicano Spanish language newspapers. In addition the public notice and fact sheet was sent in English and Spanish to approximately 1,100 residences on the facility mailing list. Information repositories for the project were set up at the DTSC Sacramento & Glendale offices and at the Fontana Public Library. A number of the documents were also available via the DTSC website, www.dtsc.ca.gov.

The 45-day public comment period for the Draft Closure Plan ended on January 26, 2007. DTSC received one public comment letter after the comment period closed on January 30, 2007. At our discretion, DTSC opted to formally respond to this letter and a Response to Comments document was prepared. DTSC concurred with one of the comments received relating to sampling of the soil adjacent to the containment areas and we have added a clarifying statement relating to fuel oxygenates. The Closure Plan changes that are required as part of this approval are summarized in an attached memorandum.

The version of the Draft Closure Plan that was public noticed was titled "Hazardous Waste Facility Closure Plan" and dated November 30, 2006.

The soil sampling plan that accompanied the Closure Plan was dated March 2006 and was conditionally approved subject to two conditions:

- Incorporating the Geological Services Unit (GSU)'s comments as outlined in their March 20, 2006 memorandum.
- The understanding that if the soil beneath the asphalt tank holding pad is deemed to be contaminated that the asphalt will also be deemed to be contaminated.

Therefore the Closure Plan DTSC is approving includes:

- The Hazardous Waste Facility Closure Plan dated November 30, 2006
- GSU memorandum dated March 20, 2006.
- Conditional Approval letter dated December 6, 2006.
- Draft to Final Changes memo dated April 16, 2007.

ECI shall provide all of these documents to the contractors that will implement the Closure Plan.

In accordance with California Environmental Quality Act, DTSC has filed a Negative Declaration with the California State Clearing House. The Negative Declaration states that DTSC finds that the implementation of the Closure Plan could not have a significant effect on the environment.

This approval letter also acts as a transmittal of documents from DTSC to ECI. Please find attached the following documents:

- Final Negative Declaration
- Notice of Determination
- Approved Closure Plan
- Memorandum outlining Closure Plan Changes from Draft to Final
- Response to Comments

DTSC intends to provide oversight of the implementation of the Closure Plan. Please let the DTSC project manager know at least three weeks in advance of work starting in order for travel and site access arrangements to be made.

Pursuant to 22 CCR 66264.113, ECI shall implement this Closure Plans within 180 days of the date of this letter.

If you have any questions regarding this letter, please contact me at (916) 255-3716, or Mr. Ryan Batty, of my staff, at (916) 255-6699.

Sincerely,

-- Signed By --

Mohinder S. Sandhu, P.E. Chief
Standardized Permitting and Corrective Action Branch
Department of Toxic Substances Control
